Azara Bedroom Collection

In Classic Bamboo with Exotic Tiger

Sable

Exotic tiger

The Azara bedroom collection by Greenington features modern architectural lines and stunning accents in exotic Tiger bamboo. Greenington's tough metal to metal connecting hardware withstands multiple bed assemblies with ease.

Shown in rich Sable finish with accents in natural exotic Tiger. The colors in exotic Tiger bamboo are achieved with heat and pressure. Exotic Tiger combines the light and dark material, creating a unique and beautifully striped grain with continuous colors throughout. No two pieces are exactly alike.

- Crafted in 100% solid Moso bamboo
- No plywood, particle board, or MDF
- Earth friendly, sustainable resource
- Hand applied rich Sable finish
- Exotic Tiger bamboo accents
- 20% harder than Red Oak
- Fully assembled nightstand and chests
- Beautifully finished all the way around
- Solid bamboo drawer box with English dovetail
- Undermount, soft closing drawer glides
- Solid bamboo slat system, no box spring needed
- Tough metal to metal connecting hardware

The Soho dining table places solid Amber bamboo on a pedestal. Simple and modern, Soho's 36" round, reverse beveled tabletop sits on a gracefully shaped tulip pedestal of matte black powder coated steel, contrasting beautifully with Amber's rich grain and variety of colors. Perfect for casual dining, the gently curved solid bamboo seat and back offers just right comfort, and beautifully contrasts with the graceful matte black steel frame. An update of a classic design, Soho's small scale is designed to fit beautifully into small eating spaces.

Sustainable and earth friendly, Amber is not a surface stain, the color is the result of an innovative process using heat, steam and pressure to entirely transform the solid bamboo material into Amber's deep color.

- Crafted in solid Moso bamboo
- No plywood, particle board, or MDF
- Eco-friendly, sustainable resource

For over 20 years Greenington's factory has been developing and manufacturing high quality bamboo products. As new technologies continue to emerge, Greenington will continue to stay on the cutting edge to maintain its role as an industry leader by providing its customers with innovative designs made of the finest materials.

- Fully assembled case goods
- Beautifully finished all around
- 5 sided drawer box with English dovetail
- Under mount, soft closing drawer glides
- Hosta - 3 piece ball bearing drawer glides
- Fully assembled chairs and stools

Greenington furniture is manufactured using only mature Moso bamboo at least 5 years old. This ensures maximum strength, hardness and stability for all our products. The caramelized and exotic bamboo materials are achieved through the process of caramelizing the sugars in the bamboo with heat and pressure. Variations in grain and color enrich the natural beauty of bamboo furniture.

- Cable assisted ball bearing table glides
- Doors - soft closing swing doors
- European slat system, no box spring needed
- Solid Moso bamboo slats
- Easy to use connected slats

Why Choose Bamboo

Bamboo is an environmentally friendly, and renewable resource, harvested from fully sustainable and rapidly growing forests.

Bamboo is one of the earth's fastest growing plants.

Bamboo is a grass which matures in 5 years or less.

Bamboo is 20 % harder than Red Oak.

Bamboo is highly efficient in carbon sequestering.

Bamboo releases 35 % more oxygen back in to the atmosphere.

Paliano Fine Bamboo Furniture

information

Environmentally Sustainable: Bamboo is one of the earth's fastest growing plants, a grass that grows to maturity in 5 years or less. Our bamboo is harvested from the managed forests of a fully sustainable, environmentally friendly and rapidly growing renewable resource.

Bamboo reduces the atmospheric concentration of carbon dioxide, which is the main contributor to reduce global warming. Bamboo releases about 35% more oxygen than equivalent stands of trees making it one of the best plants on earth to sequester carbon.

Our bamboo material has been treated and kiln dried to a specific moisture content, then put through our special manufacturing process to produce the bamboo materials we use. The VOC emissions of the adhesive used in manufacturing our products are well below allowable European, US and California standards.

Advantages

of our furniture

Hardness: Paliano furniture uses only mature Moso bamboo that is at least 5 years old ensuring that our furniture possesses strength, hardness and stability. Our Classic bamboo is 20% harder than Oak, and our Exotic bamboo is 100% harder than Red Oak.

High Quality: From processing the raw bamboo material into solid stock and panels, we make the final product in our ISO 9001 and ISO 14001 certified factories under tight quality control.

Variety of Choices: We offer a wide selection within our Classic Bamboo Collections, featuring our standard laminated panels in a natural caramelized finish, along with Black Walnut, Sable, Havana and Mocha stains. We also offer a truly 'must see to appreciate' experience with our limited collection of unique Exotic bamboo furniture, set apart by its richer and darker 'exotic' finish.

Leadership: With over 20 years experience manufacturing bamboo products, Greenington is the leading company in mid to high end bamboo furniture production. Our processes are innovative, using the latest developed technologies to create new product lines.

Frequently Asked Questions

about your new bamboo furniture

What is the difference between Classic Bamboo and Exotic Bamboo?

Our Classic Bamboo material is laminated from square edged bamboo slats under specific pressure and temperature into our stock and panel material. (20% harder than Oak.) Our Exotic Bamboo material is made by fusing thin bamboo strips under very high pressure into our stock and panel material. (100% harder than Red Oak.)

What kind of bamboo is used in Paliano Furniture?

There are more than 1200 bamboo species throughout the world. Paliano only uses mature Moso bamboo (*Phyllostachys pubescens*), valued for its hardness, durability and stability. And pandas do not feed on Moso bamboo, which is extremely important.

Is there any off-gassing to be concerned about with the adhesives used?

The adhesives used in manufacturing our products have very low off-gas emissions. The formaldehyde gas levels are well below the European, US, and including California VOC standards.

What is caramelized color?

Natural bamboo has a very blond color. Caramelized bamboo is achieved through a process called carbonization, in which the bamboo is put into steam vessels where the sugars in the bamboo are cooked. This turns the natural blond color into a darker and warmer, honey-toned color we call caramelized. No chemicals are used in this process.

Is your furniture 100% bamboo?

Yes, all Paliano bamboo furniture is made of 100% bamboo with no added filler, fiberboard, MDF or other materials.

Where are your products made?

All Paliano bamboo furniture is made in our ISO 9001 Quality Management and ISO 14001 Environment Management certified factory in China.

How do I care for and maintain the bamboo furniture?

Periodic cleaning can be done using a soft cloth and a gentle cleaner designed for wood furniture. Please visit: www.paliano.com for more detailed instructions.
